Azure DevOps Engineer with 6+ years of IT Experience

Objective

Experienced Azure DevOps Engineer with 6+ years of IT experience specializing in Kubernetes, Docker, CI/CD pipelines, and infrastructure automation using Terraform. Skilled in managing Linux environments, monitoring systems with Prometheus, and ensuring reliable, scalable deployments. Seeking a challenging role where I can contribute to building secure, high-performing, and efficient DevOps solutions.

Skill Set:

- Operating Systems: Linux
- Scripting: Basic Python, Shell scripting, Groovy
- Looking for CKA Certification and preparing for CKS al well.
- Infrastructure Automation: Terraform, Azure Bicep
- Containerization – Docker, Kubernetes, AKS
- CI/CD: Jenkins, Azure DevOps
- Versioning: Git, Gerrit
- Alerting & APM: Prometheus, Grafana
- Databases: MySQL, PostgreSQL
- Ticketing: JIRA
- Others: Confluence, SharePoint
- Cloud: Azure

Experience Summary

- Strong hands-on experience in Kubernetes, Docker, Jenkins, and Terraform.
- Skilled in building and managing CI/CD pipelines.
- Experienced in infrastructure automation and containerized deployments.
- Hands-on experience in monitoring using Prometheus, Grafana
- Expertise in troubleshooting production issues and handling incidents.
- Worked in Agile environments ensuring high availability and performance.

Experience in Detail:

Duration: April 2021 to Present
Company: Tata Consultancy Services
Designation: Assistant System Engineer

Role: Azure DevOps Engineer | AKS Platform Engineer

Project Description:

Ericsson CPP is Platform Project which provides base Operating Systems for RNC, RBS Applications. It has five modules residing in 5 different countries. Continuous Integration team provides support for Integration, Build, Testing and Release functions for all the components.

Tools used: Kubernetes**,** Docker, GIT, Jenkins, AKS
OS Platform: Linux

Roles and Responsibilities:

- Troubleshoot Issues for Kubernetes infrastructure performing admin tasks such as troubleshooting pods, deployments, services and cluster maintenance.
- Deploying Pods, Replica sets, Services and Deployments using Yaml files.
- Configuring Persistent Volume and Persistent Volume Claims for various applications
- Performing Calico, kubelet upgrades and adding worker nodes in the cluster
- Creating change request and implementing changes.
- Creating and managing Service Accounts in Kubernetes cluster as per the requirement.
- Add/Modify/Delete container resources related Quota at project level in Kubernetes.
- Troubleshooting and solving day to day issues related to Kubernetes
- Recovering from Node failures and Troubleshooting Cluster issues
- Debugging DaemonSet issues in the worker nodes
- Troubleshooting Issues related to Kubelet, CNI (Calico), Services, Ingress.
- Container monitoring stack (Prometheus, Grafana and Alert manager) for cluster level and application-level monitoring in Kubernetes
- Taking regular backups of the Kubernetes platforms.
- Hands-on knowledge of software containerization platforms like docker and orchestration tools like Kubernetes.
- Configured existing workloads to scale up or down in a containerized environment.
- **Rolled out regular updates** on existing application pods.
- Managed space across application pods by configuring persistent volumes across Docker containers.
- Worked with common **Source Code Management tools like GIT** to manage code effectively.
- Conducted direct customer interactions and meetings to clearly understand expectations and requirements.
- Wrote Pod deployment YAML files.
- Wrote Docker files.
- Automated build, test, and deployment processes.
- Integrated Git repositories with Jenkins for continuous integration.
- Created and managed Jenkins jobs and pipeline scripts (Declarative/Scripted).
- Configured automated deployments to Kubernetes environments.
- Monitored pipeline execution and resolved build failures.

Duration: 2017 to February 2021
Company: Wipro
Designation: Software Engineer

Role: DevOps Engineer

Technologies Used: Kubernetes**,** Docker, GIT, Jenkins**,** Linux
OS Platform: Linux

Roles and Responsibilities:

- Fast and value-add responses to inbound tickets from client and guide them with steps to resolve the request through both written and verbal channels or act on them depending on the requirement.
- Utilize monitoring tools to proactively identify problems with resources like servers, URLs, cloud environments for troubleshooting. Maintaining zero downtime of the infrastructure.
- Analyzing logs for understanding the issue that prevails in services that are running on the server.
- Monitor system performance.
- Administering Jenkins for enabling proper workflow and setting up pipelines for monitoring the flow.
- Designing and migrating the existing monolithic application into Microservices architecture on underlying platform Kubernetes clusters on bare metal servers.
- Managing the multiple Kubernetes clusters which has multiple tiers of PODs to launch the applications which are in multiple remote location datacenters.
- Developed and maintained CI/CD pipelines using Jenkins
- Automated the regular activities using Shell scripting and Python Scripting
- Monitor, analyze, and report performance statistics for hosted environments.
- Participating in Daily Sync up meetings with clients & internal teams as part of the Agile and Scrum process.
- Wrote docker file for easy build and deployment of docker containers.
- Managed CI/CD pipelines using Jenkins and Git.
- Containerized applications using Docker and deployed on Kubernetes clusters.
- Automated tasks using Shell and Python scripting.
- Monitored infrastructure and ensured zero downtime operations.
- Supported microservices architecture deployments across multiple environments. Wrote scripts for Jenkins CI/CD pipelines.
- Rolled out regular updates on existing application pods.
- Used GIT for SCM.

Educational Qualification

- Bachelor of Technology from Anurag University (CVSR), Hyderabad.

Awards & Recognition

- Recognized with “Best Performer” award in Wipro
- Excellence Award - Wipro Outstanding Performance Award for the year 2018 - Wipro
